#### • Final Year ME Project

##### Title: "Privatizing Location: An Approach Towards Social Application"

The whole world uses the internet to interact with surrounding with their friends and their recommendation. Without privacy protection, this system can be easily misused. LocX is latest technique used to provide protection. We use distance preserving coordinate transformation to all location data shared with the server. Our privacy mechanism guaranty that server does not inform actual location data from transformed data

#### • Final Year BE Project

##### Title: "Android Application Framework For C Programming Based On Cloud Computing".

The goal of our project is to **development of C compiler for mobile devices**. There is no real computing application i.e. those which can facilities the user to run C programs on their mobile devices or notebooks. Installation of TC was needed every time before doing any C programming but with the help of this technique there is no any requirement of installation TC.
