--	---

Method of computing

The central library implies a computerized logging system for all the users. Their incoming/outgoing date and time are logged in and maintained in the data base available of the connected computer. In order to calculate the percentage per day usage the information provided in the next section is used where the count of all the physical users (students and teachers) and number of e-access are summed up for the entire year from the monthly data. This sum is divided by the total number of working days in the year to compute the per day use.

S.No	Academic Year	Period	Total User	No of Working Days	Percentage per day usage / No of working days	Percentage (No .of usage in the Year /No. of Students)
01	2023-2024	1/7/2023 to 30/6/2024	20892	130	20892/ 160 =130	20892 / 457 = 45.71

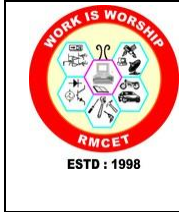

Percentage per day user: 130
