Rajendra Mane College Of Engineering, Ambav(Devrukh)
Department of Computer Engineering
Seminar on Inculcating Employability Skills in the Students

Date: 6th October 2017

Objective: Guiding the students on how to obtain employability skills.

Outcome: Students were familiarized with how they can get the employability skills in themselves.

Targeted Participants: Students from Computer Engg. Department, RMCET.

No. Of Participants: 116

Execution:

The Department of Computer Engineering organized a seminar on Inculcating Employability Skills in the Students on 6th October 2017. Mr. V. V. Parkar, Asst. Prof., Computer Engg. Dept., with the guidance from Mr. M. Y. Gadkari, HOD, coordinated the workshop.

A total of 116 students from the department attended the seminar.
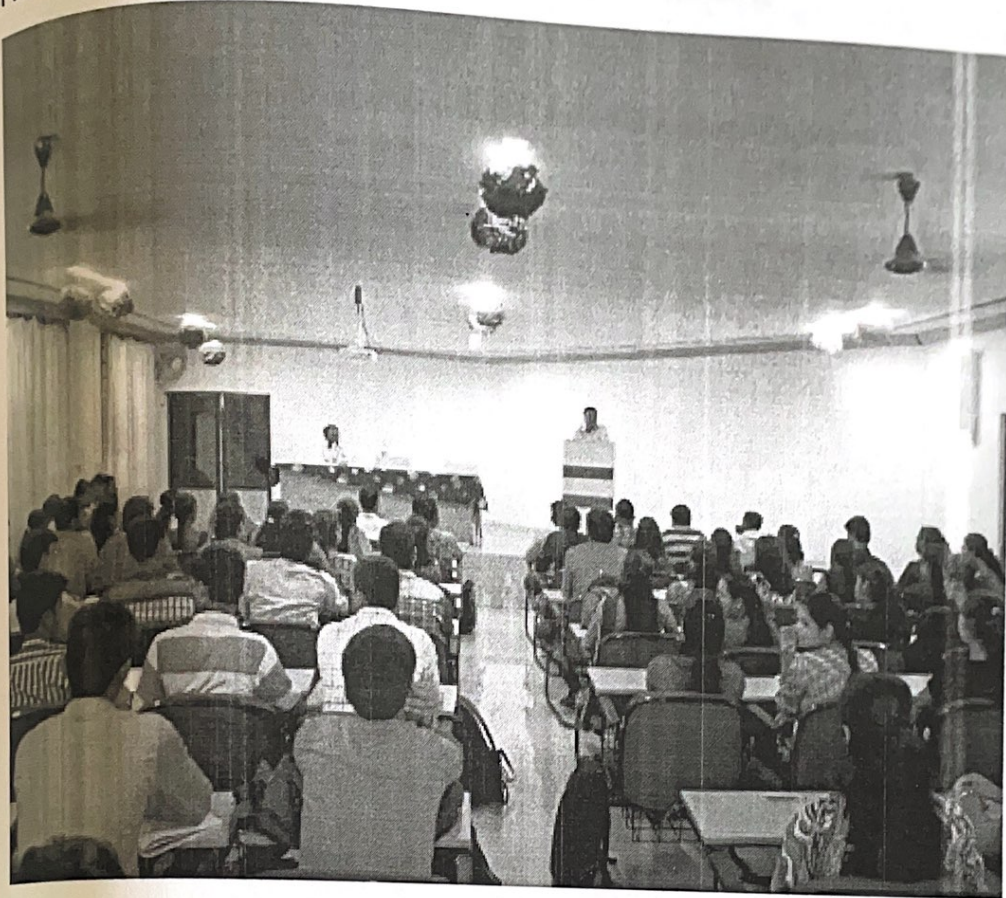

Some important guidelines given by Mr. Deo are -

Student should

- think as a designer, not as a programmer while developing their projects. UI should be user friendly. Usability, performance, security, extensibility considerations of the s/w product are must.
- Improve their communication skills.
- imbibe in themselves the collaborative work culture.
- Focus on their strengths, improve confidence and also try to diminish their weaknesses.

- At least a good programming language like C++, Java, Python along with database concepts must be mastered by students.
